

# Singletrail Moravský Kras

## Resort description

The Singletrail Center in the Moravian City of Jedovnice has had its first ever season, beginning operation in 2016. With three routes (two easy-medium and one harder) and one climbing trail, other plans for growth are in the works.

The location is well-known, among other things, because of the annual Velo Test Fest, during which one can test at will up to 400 different types of bikes in one day. The complex is situated near Brno (a trail connection with it is also planned), where there is a camp and full facilities near Olšovec Pond. There are for now almost thirty kilometers of artificially built trails with a small elevation rise, but they are really fun. The difficulty here is determined by the speed - everything could be ridden slowly by a child, whereas the quick and skilled cyclist will also get a nice jump. The surface of the trails is smooth, so it is not a problem to enjoy them on a hardtail bike. Enjoyment is also found in the adjacent surroundings, the hills covered by trails, plus the beautiful nature. For example, you can connect to the cycle path Heart of South Moravia (Srdcem Jižní Moravy). Enough fun here for the whole weekend.

Destinations	Moravia and Silesia
Route	28 km   3 hours

Surface	Circuit 1 - 10.5 km; You get elevation here immediately on a three-fold climb, however the reward is sweet in the form of a downhill with jumps and banked turns. The trail is not really demanding, children can handle it. Circuit 2 - 11.5 km; 9 km runs along trails, the rest on hardpacked roads. Lovers of speed will appreciate this circuit, with its jumps and turns. Good even for beginners or children. Circuit 3 - 6,5 km; the shortest circuit, but it will take you to the highest point of the trails, followed by turns and jumps, the difficulty is higher here, but everyone can find their own way, it all depends on speed and experience.
Activity type	Singletrack
